PROFESSIONAL SUMMARY

Senior Software QA Engineer with 5+ years of experience in manual, API, mobile, web, and automation testing. ISTQB CTFL certified. Build and maintain automated tests with Cypress for web and Maestro for mobile, test APIs with Postman, and track bugs in Jira and Azure DevOps. Experienced working in Agile (Scrum) teams, taking part in sprint planning, daily stand-ups, and releases.

EXPERIENCE

Senior Software QA Engineer | K&C (Client: Informa) | London, Remote **May 2025 – Present**

- Test the migration of **50+ enterprise event websites** from Adobe Experience Manager (AEM) to Informa's own CORE platform, making sure each new site matches the old one in features, design, and content.
- Prepare **QA sign-off** reports for each migrated website, used for formal approval before go-live.
- Mentor junior QA engineers on test cases, bug reporting, and sign-off steps, review their work, and share checklists to keep website testing consistent.
- Join handover sessions with Technical Delivery Managers and Content teams to understand platform limits and site requirements before testing starts.
- Test navigation, redirects, forms, multilingual pages, responsive layouts, media, and cross-browser support.
- Report and track bugs in **Jira**, work with Content and Delivery teams on fixes, and retest each fix before release.

Software QA Engineer | Camlist | London, Remote **May 2022 – Jun 2025**

- Increased **crash-free users from 70% to 99%** across Android and iOS through defect reporting and crash monitoring with **Firebase Crashlytics**.
- Built and maintained end-to-end mobile UI tests in **Maestro** and added them to **CI/CD**, which reduced manual regression work before each release.
- Led **Release Candidate (RC) testing** and **post-release checks** for Android, iOS, and web releases.
- Wrote end-to-end web tests in **Cypress** with **BDD (Cucumber/Gherkin)** for the main user flows and ran them in the **CI/CD** pipeline on every build.
- Tested **REST APIs** in **Postman**, checking responses, status codes, and data for the mobile and web apps.
- Took part in sprint planning and test estimation, and wrote test cases for integration and regression testing.

Software QA Engineer | Qoodz | UAE, Remote (Part-time) **Nov 2022 – Sep 2023**

- Tested Android and iOS apps (functional, usability, and regression testing) against business requirements.
- Tested APIs in **Postman** and worked with stakeholders to make requirements clear and testable.

Software QA Engineer | Digital Roots | Kuwait, Remote **Apr 2021 – Apr 2022**

- Wrote and ran test cases for Android, iOS, and web apps, checking functionality, compatibility, and usability.
- Tested APIs for correct responses, data accuracy, and backend communication.

TECHNICAL SKILLS

Testing: Functional, Exploratory, Regression, Integration, Smoke, UI, REST API, Mobile (Android/iOS), Web, Cross-Browser, Responsive, Non-Functional, Website Migration Validation, Content Validation, Requirements Analysis
Automation: Cypress, Playwright, Maestro (Mobile UI), CI/CD
Tools: Jira, Azure DevOps, Git, Postman, Firebase Crashlytics, Sentry, Confluence, Cucumber Studio, JMeter, Trello
Methodologies: Agile (Scrum), BDD (Gherkin), SDLC, STLC, Test Case Design, Defect Management, QA Sign-off
Languages: SQL, HTML, CSS, basic JavaScript, TypeScript, and Python

CERTIFICATIONS & EDUCATION

ISTQB Certified Tester Foundation Level (CTFL) | Credential ID: 210505011 **May 2021**

B.Sc., Faculty of Computers and Information, Helwan University **Sep 2014 – Jan 2019**
